

Clean Set of Claims

B1
SAC

1. A Caller ID device, comprising:
 - a memory adapted to store Caller ID data associated with an incoming call; and
 - a processor adapted to selectively store the Caller ID data in said memory based on an off-hook status of a telephone.

B2

11. A telephone, including a Caller ID device, the Caller ID device comprising:
 - a memory adapted to store incoming Caller ID data associated with an incoming call; and
 - a processor adapted to selectively store the Caller ID data in said memory based on an off-hook status of said telephone.
